

With our wish to celebrate together the significant jubilees of tourism education at the University of Belgrade – Faculty of Geography, we are informing you that

University of Belgrade – Faculty of Geography
in cooperation with
the Tourismologists Association of Serbia
and the Balkan Network of Tourism Experts

are organising a national scientific conference
with international participation

Tradition and Transformation of Tourism as a Spatial Phenomenon

Belgrade, 3rd and 4th November 2022

1st information

Since tourism development requires space and temporal frame has to be used for realistic comprehension of its dynamics, there is a clear need to continuously monitor modifications in tourism from scientific and expert point of view. Education of human resources in tourism also has a temporal dimension. University education of tourism experts in Serbia dates back to 1962 and the start of postgraduate tourism studies at the Geography study group of the Faculty of Sciences at the University of Belgrade. The first generation of students at the Tourism study group started their education 50 years ago. At the University of Belgrade – Faculty of Geography, the school year 2007/2008 marked the reestablishment of the Tourismology study group.

Scientific conference themes:

- New Reality of the Global Tourism
- Innovation in Theory and Practice of Tourism Development
- Risks and Constraints in Tourism
- Young Researchers Section
